

Daily statistics on availability and performance of InsingerGlissen's dedicated interface and its online payment channels

Note:
- InsingerGlissen does not envision to make any adaptations to the eBanking and mIn (insingerglissen.nl) interfaces and therefore is not able to identify when a third party provider logs into the Client's InsingerGlissen bank account. As a consequence the daily average time per request for AIS and AIS cannot be calculated for these interfaces.
- The mobile application does not support third party provider access and therefore does not support AIS and AIS functionality.
- No statistics are available for column Error response rate. Daily average time per request - AIS, Daily average time per request - CAF, Daily average time per request - AIS (Scheduled) SEPA credit transfer, Daily average time per request - AIS periodic SEPA credit transfer, because the PSD2 API has not been used during this period.

Table with columns: Reporting metric, Uptime, Downtime, Error response rate, and performance metrics for various interfaces (Dedicated, mIn, eBanking, Mobile application) across dates from 1-10-22 to 31-12-22.
